NEWS RELEASE

ELECTROCUBE OFFERS NEW LINE OF SEACOR POWER FILM CAPACITORS

MONROVIA, California...Electrocube, Inc., a leading U.S. manufacturer of precision film capacitors and other passive components is now offering a complete range of Seacor power film capacitors which are designed for various power electronics and electrical applications.

Key product specifications include: multiple film types, ratings up to 2000µf; 6300 volts; 100 amperes, 1200 volts/micro-second; long life over 100,000 hours, safety pressure interrupters and economical design.

Capacitors for power electronics can be used in a wide variety of applications, even where non-sinusoidal voltage and current waveforms are present. Both AC and DC capacitors are available.

For over 42 years, Electrocube, Inc. has designed and manufactured AC and DC film capacitors, RC networks, IGBT snubbers, EMI filters, aluminum foil transformers, aircraft lighting ballasts and other custom designed components.

The offering of Seacor's capacitor line has enabled Electrocube to expand their product capabilities to include a variety of components and engineering services for the electronic, industrial, military, aviation and transportation marketplaces.

For additional information on Electrocube and their Seacor power capacitors, please visit their website at www.electrocube.com or contact: Ms. Gloria Snyder, National Sales Manager, Electrocube, Inc., 1307 S. Myrtle Ave., Monrovia, CA 91016, TEL: (626) 301-0122; FAX: (626) 357-8099; e-mail: gloriasnyder@electrocube.com.
