

Manufacturing's Staying Power

Search Google for *Made in America*, *U.S. content ratios*, and *Reshoring*, and it quickly brings up headlines that point to a resurgence in national manufacturing. The opportunities to grasp are obvious, but there are obstacles to overcome as detailed in this poignant [infographic](#) from National Institute of Standards and Technology (NIST).

That's why we're especially proud to say: *Been there. Still doing that. Why?*

Products

We design and manufacture all of our [transformers](#) in the U.S.

Our [film capacitors](#) and [RC Networks](#) are designed and assembled here in the U.S., along with 50% of their content.

Our manufacturing plant has and always will be based in the U.S., qualifying for domestic content requirements and saving you on global shipping costs.

People

The [people](#) behind our products are a large part of our Made-in-America staying power:

- Josefina in RC Network Production has been here 48 years.
- Twenty-two of our team members have served Electrocube clients for more than 10 years.
- Of those 22, half have worked with us for more than 20 years!
- **15 of those 22 are women yet another manufacturing-comeback [opportunity](#) we've been doing all along.**

Cal Poly Pomona University is our neighbor, connecting us with the next generation of manufacturing that is so vital to our sustained success.

As always, we don't outsource any segment of our sales, service or support experience an advantage we know our clients value.

Put another way, Made in the USA... *It's a part of what we do.*

Look what you're a part of...

Valued partners: A staple in our nationwide network of sales reps is QRep Inc. (Quality Representation of Electronic Products) -- an electronics manufacturers representative firm for the Southeast's Aerospace, Military, Avionics, Industrial and Medical industries, among others. With a diverse background, external reps and customer service centers, [QRep](#) is fully equipped to partner with design engineers.

Electrocube Fitness Challenge: With one week left in our fitness challenge, we're racing toward the finish line. See final results next month.

contact us (909) 595-4037 || visit us electrocube.com

Founded in 1961, [Electrocube](#) specializes in custom designs and the manufacture of film capacitors, RC Networks, EMI Filters and foil transformers for a wide range of applications in the aerospace, audio, elevator, heavy equipment industries and more.
