

## Ready, Set...

Take a look at Electrocubes booth from last months Applied Power Electronics Conference (APEC). Its *simple, streamlined* and features our core product opportunities. Its similar to our approach with you, our customers and partners, as cautious optimism gives way to real optimism.

Looking ahead, we see promising signs:

- A continual drive to reshore to Made in America manufacturing with new hubs popping up across the country;
- Collaboration that supports engineers earlier in the custom design process;
- Product and service diversification from standard to specialty designs, and
- Even opportunities to recreate tried and true components with materials and methods that improve core products in the industry.

What does that mean for you with Electrocube?

- Let our experts design [Transformer Rectifier Units \(TRUs\)](#) with needed power conversion for avionics made 100% in the USA.
- Streamline design processes with our [full-time engineering staff](#), equipped and eager to dive into the toughest of intricate details as early in the design process as possible for you.
- Hear the difference in our newly designated line of [Audio-optimized Capacitors](#) for professional, commercial stage, studio and instrument use.
- Get technical with us. We eagerly listen to you. Our sales and service support are ready for even the most rigorous of production schedules. Thats why were gathering our sales reps at EDS next month to collaborate on what we can do faster and better for you and to look at the year ahead, prepared for the market resurgence thats coming.

Indeed, the power electronics industry is alive and well powering the dynamic and ever-changing digital age of tomorrow. Are you ready and set to go?
