

## The Value of Fine-tuning Well. . .

Fresh from APEC and with our annual sales conference at EDS next week, we find the fruition of our [2016 Picks & Wisdom](#) at trade shows and in daily operations. The same business comes in new patterns. We're using our own advice to inform our approach to this unique situation:

**Do well:** Electrocubes signature product is our varied, diverse and reliable film

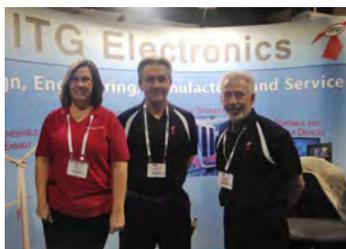

capacitor. From thousands of [standard capacitors](#) in stock to [custom caps](#) designed for specific needs, we continue to deliver quality film capacitors and pioneer new avenues for this integral part of what we do.

**Fine-tune:** Electrocubes audio enthusiasts are diligently working on two new additions to our [audio capacitor](#) lines: First up, a new line of Red Drop Epoxy Dip audio caps coming soon. Second, a new electrolytic line of capacitors for audio use dubbed the AEL series to come later this year.

**Add value:** Our work with [design engineers](#) to meet their unique needs is a big, fun part of what we do. We get to share our knowledge and geek out with colleagues over new challenges. In turn, this knowledge-sharing expands best practices and insights. That's why we continue to add to our library of technical bulletins. Stay tuned for the upcoming Speaker Cross-Over Caps from [Tom Colella](#), Design Engineer, that will feature Electrocubes 967D audio caps.

---

### Look what you're a part of . . .

**Valued partners:** We caught up with Roger Auerbacher and Zoltan Puskas of Inter-Technical Group, Inc. (ITG) at APEC.

One of our trusted, franchised distributors for nearly a decade, Roger and Zoltan discussed the opportunities that come with ITG's expansion to include design, sales and manufacturing capabilities throughout Asia, in addition to its U.S. operations. ITG's website is also set for expansion soon. A veteran

primary supplier of passive components since 1963, ITG's expansion provides cost-effective total solutions to its established reputation for outstanding customer service.

**Trade show season:** Two more shows to go: Visit us at Booth #240 in the [Del Mar Electronics Show](#) in San Diego May 4-5. Or, [meet us](#) at [EDS](#) May 10-13 in Las Vegas.

**Film Capacitors ■ EMI Filters ■ RC Networks ■ Transformers**

**contact us (909) 595-4037 || visit us [electrocube.com](http://electrocube.com)**

Founded in 1961, [Electrocube](#) specializes in custom designs and the manufacture of film capacitors, RC Networks, EMI Filters and foil transformers for a wide range of applications in the aerospace, audio, elevator, heavy equipment industries and more.
